

Conference Schedule at Your Church

Speaker: **Dr. Craig Glickman**, a leading scholar on the Song of Solomon, will be speaking on six topics covered in his best-selling book, *Solomon's Song of Love*.

Friday, April 9, 2004, 7pm-10pm

Saturday, April 10, 2004, 9am-12noon

"Poets once explained love as the work of Cupid's arrow, or the effect of magic stardust cast upon the earth. By such myth they honored the mystery of love. They knew the heart had reasons, which reason did not know.

And the heart of love revealed love not in science but in song. The best songs let them see love, and the great songs let them feel love. One song, it was rumored, had even the power to instill love. The ancient poets spoke in awe its name. The Song of Songs, they whispered.

Some believe its power still remains. And for those of us who brush time's dust from its enchanted pages, the Song still sprinkles stardust on our dreams."
